Bristol Sinks & Faucets

Solid stainless steel – lead free faucets

Lifelong Elegance, Style & Health delivered to your home via our lead free faucets.

The majority of faucets on the market today are constructed of a chrome plated Brass alloy, a copper based material that also contains zinc and lead. Brass faucets can leach unsafe amounts of lead into our drinking water posing a dangerous risk for our families. Bristol Sinks faucets are crafted with premium type 304 stainless steel that not only brings lead free water into your home, but provides you with comfort knowing your faucet will have a long life; corrosion, rust and chip free.

Nos robinets sans plomb vous offrent élégance à vie, style et santé à domicile.

La plupart des robinets actuellement commercialisés sont constitués d'un alliage de laiton chromé, un matériau à base de cuivre qui contient également du zinc et du plomb. Les robinets en laiton peuvent filtrer des quantités dangereuses de plomb dans notre eau potable qui représentent un danger pour nos familles. Les robinets de Bristol Sinks sont conçus en acier inoxydable de type 304 de qualité supérieure qui non seulement apporte de l'eau sans plomb dans votre maison, mais vous offre un confort en sachant que votre robinet aura une longue vie; sans corrosion, rouille ni écaillage.

ACCESSORIES

LIMITED LIFETIME WARRANTY

Faucets

Bristol Sinks and Faucets hereby warrants that all product purchased for installation and operation in a personal residence shall be free from defects in materials and workmanship under normal use throughout its lifetime so long as the product: 1) remains installed in its original location, and 2) the original consumer continues to own such residence, and, 3) installation has been completed by a licensed professional plumber or contractor.

Notwithstanding the foregoing, the warranty with respect to hand spray devices and hoses shall be one year only.

Not Covered Under this Warranty:

This is a product warranty only. Bristol Sinks and Faucets warrants only replacement parts. This warranty does not extend to the following:

- Shipping or labour costs associated with the removal or reinstallation of product;
- Damages of any nature and kind and howsoever caused during installation, repair or replacement of product;
- Consequential, ancillary or incidental damages of any nature and kind and howsoever caused to contiguous surfaces and appliances during removal or reinstallation of the product, or arising through failure of the product;

Warranty Contact Information

For warranty service, the original customer should provide claim information directly through Bristol Sinks and Faucets, together with original proof of purchase.

- Personal injury, property damage or economic loss occasioned to any party;
- Product scuffing or scratching from normal use or resulting from the application of abrasive or corrosive cleansers;
- Product installed, or in use in commercial applications;
- Damages resulting from misuse, accident, neglect or any use that violates the instruction materials provided by Bristol Sinks and Faucets;
- Product installed in an application subsequent to the original installation.

Bristol Sinks and Faucets assumes no liability whatsoever with respect to compliance with Building Code or Plumbing Code requirements in any jurisdiction where product is, or has been purchased for installation, and all such compliance matters shall be the responsibility of the consumer, or consumer's installer.

This warranty gives you specific legal rights. So far as permitted by law, it represents the only warranty provided by Bristol, and where permitted by law, supercedes and replaces any warranties under applicable legislation, including any statutory warranties of merchantable quality or fitness for a particular purpose.

Bristol Sinks

AND FAUCETS

LIMITED LIFETIME WARRANTY

Sinks

Bristol Sinks and Faucets hereby warrants to the original consumer that this product shall be free from defects in materials and workmanship throughout its lifetime provided that the following conditions have been met:

- The product has been installed by professional installers who are sufficiently trained to competently complete such installations;
- Installation has been in accordance with Bristol's Installation Guide within a home or other residential setting and damage has not been incurred through misinstallation or modification of the product, or through the negligence or willful actions of the installer;
- Failure of, or damage to the product is not occasioned or contributed to by misuse, abuse, modification, failure to maintain or clean the product, (or the use of corrosive or other cleaning agents or chemicals which mar the finish) or by denting of the product through impact while in service;
- Damage to the product is not caused by improper shipping, packaging, or handling, use of replacement parts not provided or approved by Bristol, or arising from environmental causes beyond the control of Bristol.

If, when presented with proof satisfactory to Bristol that both the product is defective, and that the claimant is the original consumer, Bristol will provide new product of the same, or of equivalent design and value, as determined by Bristol. Bristol Sinks and Faucets reserves the right to inspect all product for defects prior to meeting its warranty commitment herein.

This lifetime limited warranty shall not extend to commercial installations, or uses, or to residential installations where the product has been subjected to uses beyond those normally undertaken within a home environment. Normal wear and tear, (including scuffs and scratches while in service) shall not be included within this warranty.

This is a product warranty only. Bristol Sinks and Faucets shall not be responsible for consequential or incidental damage occasioned to countertops, tile, marble or other contiguous surfaces through removal of defective product or during reinstallation of replacement product, or for labour or other incidental costs and outlays associated with any of the removal, or reinstallation of product, or its return to Bristol. Further, Bristol shall not in any manner be liable, or responsible for postage or shipping costs associated with product returns.

Bristol Sinks and Faucets assumes no liability what-so-ever with respect to compliance with Building Code or Plumbing Code requirements in any jurisdiction where product is, or is intended to be installed and all such compliance matters shall be the responsibility of the consumer, or consumer's installer.

This warranty represents the complete liability of Bristol Sinks and Faucets to the original consumer and shall not extend to protect the interests of any party in addition to, or subsequent to the original consumer herein. Further, it shall apply only with respect to the original installation immediately after purchase from Bristol, and not to any subsequent installation.

This warranty gives the original consumer specific legal rights. So far as permitted by law, it represents the only warranty provided by Bristol, and where permitted by law, supercedes and replaces any warranties under applicable legislation, including any statutory warranties of merchantable quality or fitness for a particular purpose.

Warranty Contact Information

DOUBLE OFFSET BOWL SINK

Your Virtuo Granite sink is manufactured with the highest possible standards. To ensure that your sink maintains its beautiful look, Bristol recommends that following these simple guidelines will be the key to sustaining & maintaining your Virtuo's sink original distinctiveness.

1) Daily cleaning is recommended with any non-abrasive cleaner and hot water, followed by a clear water rinse. (Mild liquid dish detergent, Barkeeper's friend, or a cream cleaner). We would recommend using a soft damp cloth or sponge or if the stain has been existent for a period of time, using a scotchbrite pad R. Always clean in circular motions with little pressure on the surface of the sink. If necessary, please repeat this process for more stubborn stains followed by a clean water rinse. We would also recommend drying the sink with a soft cloth to avoid limescale buildup.

2) Descaling in certain areas the water quality is extremely hard & filled with mineral deposits. The staining is generally caused by a buildup of lime deposits, which accumulates on the surface of the sink if allowed to dry naturally. Following step 1 should avoid this problem. To remove any limescale that has built up over time, Bristol recommends using a natural remedy of 3 parts hot water to 1 part white vinegar & allowing this mixture to saturate the affected areas of the sink. This will loosen the limescale to allow for a complete scrubbing with a scotchbrite pad and cleaner as recommended in step 1. Always finish off by rinsing your sink with clean water to remove any residue & dry with a soft cloth to avoid recurrence of any buildup. If the natural remedy does not work, use a common descaler ensuring it contains no formic acid. Follow the manufacturer's directions for use & finish the process with the rinse & dry method described above.

3) Metal Abrasion-Scratching could occur if pots, pans or utensils make hard contact with the sink surface. This action may cause marks which are metal deposits causing a residue on the sink surface. To remove the metal marking, use a soft nylon brush or scotchbrite pad R & a mild liquid soap to scrub the entire area, in a circular motion. Repeat the rinsing & drying method as outlined in Step 1.

Votre évier en granite Virtuo est fabriqué dans le respect des normes les plus strictes. Pour garantir que votre évier conserve son superbe aspect, Bristol recommande de suivre ces conseils simples afin de conserver et de maintenir le caractère distinctif original de votre évier Virtuo.

1) Nous recommandons d'effectuer un nettoyage quotidien avec de l'eau chaude et un nettoyant non abrasif, puis de rincer à l'eau douce (détergent à vaisselle doux, nettoyant Barkeeper's Friend ou crème à récurer). Nous recommandons d'utiliser un chiffon doux ou une éponge, ou si la tache est présente depuis un certain temps, utilisez un disque Scotch-Brite(R). Nettoyez toujours en faisant des mouvements circulaires sans appuyer sur la surface de l'évier. Si nécessaire, répétez cette procédure pour les taches plus tenaces, puis rincez à l'eau propre. Nous recommandons également d'essuyer l'évier à l'aide d'un chiffon doux pour éviter la formation de calcaire.

2) Déterminez certaines zones où la qualité de l'eau est extrêmement dure et remplie de dépôts minéraux. Les taches sont généralement dues à la formation de dépôts calcaires, qui s'accumulent à la surface de l'évier si vous le laissez sécher naturellement. Suivez l'étape 1 pour éviter ce problème. Pour éliminer le calcaire accumulé au fil du temps, Bristol recommande d'utiliser une solution naturelle avec 3 quarts d'eau chaude pour 1 quart de vinaigre blanc et de laisser poser le mélange sur la partie affectée de l'évier. Cela permettra de décoller le calcaire que vous pourrez ensuite frotter avec un disque Scotch-Brite et un agent nettoyant, tel que recommandé dans l'étape 1. Pour finir, rincez toujours votre évier à l'eau propre pour éliminer tout résidu et essuyez-le avec un chiffon doux pour éviter toute nouvelle accumulation de calcaire. Si la solution naturelle ne fonctionne pas, utilisez un produit de détartrage usuel en vous assurant qu'il ne contient pas d'acide formique. Respectez les conseils d'utilisation du fabricant et terminez en utilisant la méthode de rinçage et de séchage décrite ci-dessus.

3) L'abrasion et les rayures métalliques se produisent si des casseroles, des poêles ou des ustensiles sont en contact avec la surface de l'évier. Cela peut provoquer des marques de dépôts métalliques qui favorisent les résidus à la surface de l'évier. Pour éliminer les marques métalliques, utilisez une brosse en nylon douce ou un disque Scotch-Brite(R) et un savon liquide doux pour frotter toute la zone en faisant des mouvements circulaires. Répétez la méthode de rinçage et de séchage, tel qu'indiqué dans l'étape 1.

SINGLE BOWL UNDERMOUNT SINK

Do's:

- 1) Maintain your beautiful Virtuo sink by regular cleaning on a daily basis
- 2) Rinse & dry your sink after each application to avoid a major cleaning (This is especially important where water quality is very high in minerals)
- 3) Keep the sink free of any standing water, as this could cause mineral deposits to build up on the surface of the sink. This would be more noticeable in the dark coloured sinks such as Coffee Brown or Pearl Black.
- 4) To remove mineral deposits, use a diluted solution of white vinegar and water-3 parts water to 1 part white vinegar. Rinse thoroughly after this application and dry with a soft cloth or paper towel.
- 5) Use a scotchbrite pad and gentle cleanser to remove stubborn stains or metal marks caused by pots and pans. Scrub the affected areas in a circular motion followed by rinsing and drying.

Don'ts:

- 1) Avoid dropping any sharp item or object on the surface of your Virtuo Granite sink.
- 2) Do not use any metal scouring or steel wood pads, as these will leave metal residue on the surface of the sink. Over time, these particles will turn to rust & then present an appearance of being stained
- 3) Do not leave any cast iron or stainless steel cookware or implements on the surface of the sink for an unlimited period of time. This will only cause staining to your new Virtuo granite sink.
- 4) Ensure that rubber dish mats, wet sponges or cleaning pads are not left in the sink overnight, as this will cause trapped water in the sink which will turn into staining and discolouration.
- 5) Do not allow bleach or any products containing chlorinated solvents or formic acids (common descaling products) to make contact with the surface of your Virtuo Granite sink as this could cause discoloration.
- 6) Do not place any hot objects on the surface of your Virtuo Granite sink, as this is not recommended as a cooling place & could cause potential damage to your sink.

À faire:

- 1) Entretenez votre superbe évier Virtuo en procédant à un nettoyage régulier quotidien.
- 2) Rincez et séchez votre évier après chaque utilisation pour éviter un nettoyage important (ceci est particulièrement important lorsque l'eau contient une teneur élevée de minéraux).
- 3) Ne laissez pas d'eau stagner dans l'évier, car cela pourrait provoquer la formation de dépôts minéraux à la surface de l'évier. Cela est bien plus visible sur les éviers aux couleurs foncées, comme le marron café ou le noir perle.
- 4) Pour éliminer les dépôts minéraux, utilisez une solution diluée à base de vinaigre blanc et d'eau comportant 3 quarts d'eau pour 1 quart de vinaigre blanc. Rincez abondamment après cette application et essuyez avec un chiffon doux ou une serviette en papier.
- 5) Utilisez un disque Scotch-Brite et un agent nettoyant doux pour éliminer les taches tenaces ou les marques métalliques dues aux casseroles et aux poêles. Frottez les parties affectées en faisant des mouvements circulaires, puis rincez et essuyez.

À ne pas faire :

- 1) Evitez de faire tomber des éléments ou objets tranchants sur la surface de votre évier en granite Virtuo.
- 2) N'utilisez pas d'éponge métallique ou de tampons en laine d'acier pouvant laisser des résidus métalliques à la surface de l'évier. Au fil du temps, ces particules rouillent et donnent un aspect de saleté.
- 3) Ne laissez pas de batteries de cuisine ou d'ustensiles en fonte ou en acier inoxydable sur la surface de l'évier pendant une durée illimitée, car cela tachera votre nouvel évier en granite Virtuo.
- 4) Veillez à ne pas laisser de dessous de plats en caoutchouc, d'éponges humides ou de tampons de nettoyage dans l'évier pendant la nuit, car l'eau emprisonnée dans l'évier provoquera l'apparition de taches ou une décoloration.
- 5) N'utilisez pas d'eau de javel ou tout autre produit contenant des solvants chlorés ou des acides formiques (produits de détartrage usuels) sur la surface de votre évier en granite Virtuo, car cela pourrait le décolorer.
- 6) Ne posez pas d'objets chauds sur la surface de votre évier en granite Virtuo; cela n'est pas un emplacement recommandé pour le refroidissement et pourrait endommager votre évier.
